

CURRICULUM VITAE AND LIST OF PUBLICATIONS
LIST OF INVITED LECTURES

Pierre-A. VUILLERMOT, Ph. D.,
Emeritus Professor of Mathematics
Université de Lorraine
Institut Élie Cartan
B.P. 239
Office 103
F - 54506 Vandoeuvre-lès-Nancy cedex
France

Telephone : +33-(0)-372-745-360
e-mail: pierre.vuillermot@univ-lorraine.fr

Integrated Member CEMS.UL
Center for Mathematical Studies
Universidade de Lisboa
Faculdade de Ciências
Office 6. 1. 10
Campo Grande, Edifício C. 6
P - 1749-016 Lisboa
Portugal

Telephones : +351-217-500-276 ext.26169
e-mail: pavuillermot@fc.ul.pt

Home Address :

110, Avenida Dom João II, Apt. 4D
Parque das Nações
P-1990-366 Lisboa
Portugal

Telephones: +351-932-551-871
+33-(0)-688-708-316

Personal Data:

Place of birth: Couvet (NE), Switzerland
Citizenships: French and Swiss

Spoken and Written Languages:
English, French, German, Italian, Portuguese.

Fields of Research:

Stochastic Analysis, Stochastic Differential Equations, Mathematical Physics.

Education:

Undergraduate studies:

October 1967-October 1971: Swiss Institute of Technology (ETHZ), Zürich; degree in Physics received in October 1971.

Graduate studies:

January 1972-November 1974: University of Neuchâtel; Ph.D. in Mathematical Physics received in November 1974.

Employment:

November 1974-October 1975: Research Fellow, University of Neuchâtel.

November 1975-August 1978: Research Scientist, Princeton University; partially supported by a grant from the Swiss National Science Foundation for Scientific Research.

September 1978-August 1980: Instructor in Mathematics, Georgia Institute of Technology, Atlanta.

September 1980-August 1983: Assistant Professor of Mathematics, Emory University, Atlanta.

September 1983-August 1985: Assistant Professor of Mathematics, University of Texas, Arlington.

September 1985-August 1989: Associate Professor of Mathematics, University of Texas, Arlington.

September 1989-August 1994: Full Professor of Mathematics, University of Texas, Arlington.

October 1992-August 1994: Full Professor of Mathematics, University of Metz and University of Nancy 1, while on leave from the University of Texas at Arlington.

September 1994-August 2014: Full Professor of Mathematics, University Henri-Poincaré, Nancy, which became part of the newly created University of Lorraine as of January 2012.

As of September 2014: Emeritus Professor of Mathematics at the University of Lorraine.

January 2017-December 2019: Visiting Professor of Mathematics, University of Lisbon.

January 2020-December 2023: Integrated Member GFM, University of Lisbon.

As of January 2024: Integrated Member CMAFcIO, University of Lisbon.

Short-Term Appointments:

Summer semester 1982: Department of Mathematics and Department of Physics, University of São-Paulo.

Summer semester 1985: Mathematics Research Center, ETHZ, Zürich.

Summer semester 1986: Mathematics Research Center, ETHZ, Zürich; Department of Mathematics, University of Oulu.

Summer semester 1987: Department of Mathematics, University of Trento.

Summer semester 1988: Mathematics Research Center, ETHZ, Zürich.

Winter semester 1988: Department of Mathematics, University of Trento.

Summer semester 1989: Department of Mathematics, University of Trento; Department of Mathematics, University of Oulu.

Academic years 1989-1991: Max-Planck Institute, Bonn.

Summer semester 1992: Mathematics Research Center, ETHZ, Zürich.

Summer semester 1994: Department of Mathematics, University of Bayreuth.

Summer semester 1995: Institute for Mathematics and its Applications, University of Minnesota, Minneapolis.

Summer semester 1996: Department of Mathematics, University of California, Santa Cruz.
Winter semester 1996: Mathematics Research Center, ETHZ, Zürich.
Winter semester 1997: Mathematical Sciences Research Institute, MSRI, Berkeley.
Winter semester 1998: Mathematics Research Center, ETHZ, Zürich.
Winter semester 1999: Center for Dynamical Systems and Nonlinear Studies, Georgia Institute Of Technology, Atlanta; Department of Mathematics, ETHZ, Zürich.
Summer semester 2000: Mathematics Research Center, ETHZ, Zürich.
Winter semester 2000-2001: Mathematics Research Center, University of Barcelona.
Summer semester 2001: Mathematics Research Center, ETHZ, Zürich.
Winter semester 2001-2002: Mathematics Research Center, University of Barcelona.
Summer semester 2002: Mathematics Research Center, ETHZ, Zürich.
Winter semester 2002-2003: Mathematics Research Center, University of Barcelona.
Summer semester 2003: Mathematics Research Center, ETHZ, Zürich.
Winter semester 2003-2004: Mathematics Research Center, University of Barcelona.
Summer semester 2004: Mathematics Research Center, ETHZ, Zürich.
Winter semester 2004-2005: Mathematics Research Center, University of Barcelona.
Summer semester 2005: Institute for Theoretical Physics and Mathematics Research Center, ETHZ, Zürich, and Department of Mathematical Physics, University of São Paulo.
Summer Semester 2006: Institute for Theoretical Physics, ETHZ, Zürich, and Department of Mathematical Physics, University of São Paulo.
Winter semester 2006-2007: Mathematics Research Center, University of Barcelona.
Summer Semester 2007: Institute for Theoretical Physics, ETHZ, Zürich.
Winter Semester 2008: Department of Mathematical Physics, University of São Paulo.
Summer Semester 2008: Mathematics Research Center, ETHZ, Zürich.
Summer Semester 2009: Institute for Theoretical Physics, ETHZ, Zürich, Institute for Interdisciplinary Research, University of Lisbon.
Summer Semester 2010: Mathematics Research Center, ETHZ, Zürich, Institute for Interdisciplinary Research, University of Lisbon.
Summer Semester 2011: Mathematics Research Center, ETHZ, Zürich, Institute for Interdisciplinary Research, University of Lisbon.
Summer Semester 2012: Mathematics Research Center, ETHZ, Zürich, Institute for Interdisciplinary Research, University of Lisbon.
Summer Semester 2013: Institute for Interdisciplinary Research, University of Lisbon.
Summer Semester 2014: Institute for Interdisciplinary Research, University of Lisbon.
Winter Semester 2014: Mathematics Research Center, ETHZ, Zürich.
Summer Semester 2015: Institute for Interdisciplinary Research, University of Lisbon.
Winter Semester 2015: Mathematics Research Center, ETHZ, Zurich.
Summer Semester 2016: Mathematics Department, University of Lisbon.

Research Grants and Awards:

Academic years 1975-1978:

- (1) Grant from the Ministry of Education of the Canton of Neuchâtel.
- (2) Grant from the Holderbank Foundation for Scientific Research.
- (3) Grant from the Swiss National Science Foundation.

Academic years 1978-1980: Grant from the von Humboldt Foundation (declined).

Academic year 1980-1981:

- (1) Grant from the Woodruff Foundation of Emory University.
- (2) Grant from the U.S. Department of Energy.

Academic year 1982-1983: Grant from the U.S. National Science Foundation.

Academic year 1983-1984: Summer grant from the University of Texas, Arlington.

Academic year 1985-1986: Grant from the Finnish Academy of Sciences.

Academic year 1986-1987: Grant from the Italian Science Foundation (CNR).

Academic year 1987-1988: Grant from the Italian Science Foundation (CNR).

Academic year 1988-1989: Grants from the Italian Science Foundation (CNR) and from the Finnish Academy of Sciences.

Academic years 1989-1991: Fellow of the Max Planck Society.

Academic year 1997-1998: Research Professorship Award from the Mathematical Sciences Research Institute, MSRI, Berkeley.

Academic years 2000-2002: Grant from the Spanish Ministry of Education.

Academic years 1994-2006: Grant from the French Ministry of Education.

Editorial Activities:

Editorial Board Member for Stochastic Analysis and Applications.

List of Publications

I - Articles and Books:

1. (With Romerio M. V.) *Exact Solution of the Maier-Saupe Model for a Nematic Liquid Crystal on a One-Dimensional Lattice*, Journal of Physics C. Solid State Physics 6 (1973): 2922-2930.
2. (With Romerio M. V.) *On Some Classical Vector Models in Statistical Mechanics*, Journal of Physics C. Solid State Physics 7 (1974): 1033-1045.
3. (With Romerio M. V.) *Absence of Long-Range Order for a Class of Two-Dimensional Systems*, Proceedings of the Third International Colloquium on Group Theoretical Methods in Physics, Publication CNRS, Marseille (1974): 153-159.
4. (With Romerio M. V.) *Absence of Ordering in a Class of Lattice Systems*, Communications in Mathematical Physics 41 (1975): 281-288.
5. (With Kunz H. and Pfister C. E.) *Correlation Inequalities for Some Classical Spin Systems*, Physics Letters 54A, 6 (1975): 428-430.
6. Quelques Résultats Rigoureux en Mécanique Statistique, Applications au Problème des Changements de Phase (1975), Lang Druck AG-Bern.
7. (With Kunz H. and Pfister C. E.) *Inequalities for Some Classical Spin Vector Models*, Journal of Physics A. Mathematical and General 9 (1976): 1673-1683.
8. *Absence of Ordering in a Class of Random Spin Systems, Including Simple Models for Spin Glasses and a New Inequality for Random Ferromagnets*, Physics Letters 61A (1977): 9-12.
9. *Thermodynamics of Quenched Random Spin Systems and Application to the Problem of Phase Transitions in Magnetic (Spin) Glasses*, Journal of Physics A. Mathematical and General 10 (1977): 1319-1333.

10. *Intertwining Relations Between the Dynamics of the Infinite Classical and Quantum Heisenberg Models: A New Application of Trotter Approximations and of the Coherent State Formalism*, Lettere Al Nuovo Cimento 24 (1979): 333-338.
11. (With Bountis T. C., Eminhizer C. R. and Helleman R. H. G.) *Variational Studies of the Beam-Beam Interactions*, Proceedings of the Symposium on the Physical and Mathematical Aspects of Beam-Beam Interactions, Brookhaven Report, BNL 25703, Brookhaven National Laboratory, Upton (1979): 35-59.
12. (With Sarbach S.) *Phase Transitions in Quantum X-Y and Heisenberg Models: Critique of N. Szabo's Discussion*, Helvetica Physica Acta 52 (1979): 230-237.
13. *Nonlinear Dynamics of the Infinite Classical Heisenberg Model and Classical Limit of the Corresponding Quantum Time Evolution*, Communications in Mathematical Physics 76 (1980): 1-26.
14. *Nonlinear Hill's Equations and the Beam-Beam Interaction*, Proceedings of the Seminar of the Beam-Beam Interaction, Stanford Linear Accelerator Center-Publication, Conference 8005102 (1980): 312-331.
15. *Solution of a Nonlinear Sturm-Liouville Eigenvalue Problem and the Question of Motion Stability in Intersecting Storage Rings*, Lettere al Nuovo Cimento 33 (6) (1982): 154-158.
16. *A Class of Orlicz-Sobolev Spaces with Applications to Variational Problems Involving Nonlinear Hill's Equations*, Journal of Mathematical Analysis and Applications 89 (1) (1982): 327-349.
17. *One-Parameter Families of Sturm-Liouville Eigenfunctions and of Periodic Solutions for a Class of Nonlinear Hill's Equations*, Journal of Mathematical Analysis and Applications 97 (1) (1983): 21-37.
18. *A Class of Sturm-Liouville Eigenvalue Problems with Polynomial and Exponential Nonlinearities*, Journal of Nonlinear Analysis: Theory, Methods, and Applications 8 (7) (1984): 775-796.
19. *A Class of Elliptic Partial Differential Equations with Exponential Nonlinearities*, Mathematische Annalen 268 (4) (1984): 497-518.
20. *A Class of Isoperimetric Variational Problems on Certain Orlicz-Sobolev Spaces*, Proceedings of the Second UAB International Conference on Differential Equations, I. Knowles and R. Lewis, editors, North-Holland Mathematics Studies 92 (1984): 553-559.
21. *Remarks on Some Strongly Nonlinear Degenerate Sturm-Liouville Eigenvalue Problems*, Proceedings of the 6th UTA International Conference on Trends in Theory and Practice of Nonlinear Analysis, V. Lakshmikantham, editor, North-Holland Mathematics Studies 110 (1985): 441-444.
22. *Non-Existence de Vibrations Libres Localisées pour Certaines Equations des Ondes Semilinéaires sur R^2* , Comptes Rendus de l'Académie des Sciences de Paris 303, I (1986): 395-398.

23. *Existence and Regularity Theory for Isoperimetric Variational Problems on Orlicz-Sobolev Spaces : A Review*, Proceedings of the AMS-SIAM Summer Seminar on Nonlinear Systems of Partial Differential Equations in Applied Mathematics, B. Nicolaenko, D.D. Holm, J.M. Hyman, editors, AMS-Lectures in Applied Mathematics 23 (2) (1986): 109-122.
24. *On a Class of Strongly Nonlinear Dirichlet Boundary-Value Problems: Beyond Pohozaev's Results*, Nonlinear Functional Analysis and its Applications, F. Browder, editor, Proceedings of Symposia in Pure Mathematics 45 (2) (1986): 521-525.
25. *Hölder-Regularity for the Solutions of Strongly Nonlinear Eigenvalue Problems on Orlicz-Sobolev Spaces*, Houston Journal of Mathematics 13 (2) (1987): 281-287.
26. *Elliptic Regularization for a Class of Strongly Nonlinear Degenerate Eigenvalue Problems on Orlicz-Sobolev Spaces I: The ODE Case*, Houston Journal of Mathematics 13 (4) (1987): 573-597.
27. *Nonexistence of Spatially Localized Free Vibrations for a Class of Nonlinear Wave Equations*, Commentarii Mathematici Helvetici 62 (4) (1987): 573-586.
28. *Compact Embeddings for Weighted Orlicz-Sobolev Spaces on R^N* , Mathematische Annalen 279 (2) (1987): 277-296.
29. *Spatially Localized Free Vibrations for Certain Semilinear Wave Equations on R^2 : Recent Results and Open Problems*, Proceedings of the Third UAB International Conference on Differential Equations and Mathematical Physics, I. Knowles, Y. Saito, editors, Springer Verlag, Lecture Notes in Mathematics 1285 (1987): 493-499.
30. (With Scarpellini B.) *Variétés Stables et Instables pour Certaines Equations des Ondes Semilinéaires dans R^2* , Comptes Rendus de l'Académie des Sciences de Paris 306, I (1988): 33-36.
31. *Variétés Lisses Associées à Certains Systèmes Dynamiques et Solitons Périodiques pour les Equations de Klein-Gordon Nonlinéaires sur R^2* , Comptes Rendus de l'Académie des Sciences de Paris 307, I (1988): 639-642.
32. (With Scarpellini B.) *Smooth Manifolds for Semilinear Wave Equations on R^2 : On the Existence of Almost-Periodic Breathers*, Journal of Differential Equations 77 (1) (1989): 123-166.
33. *Problèmes de Cauchy Multipériodiques et Solitons Quasipériodiques pour les Equations de Klein-Gordon Nonlinéaires sur R^2* , Comptes Rendus de l'Académie des Sciences de Paris 308, I (1989): 215-218.
34. *Smooth Manifolds for Multiperiodic Cauchy Problems and Quasi- Periodic Solitons for Nonlinear Klein-Gordon Equations on R^2* , Proceedings of the International Conference « Advanced Topics in the Theory of Dynamical Systems », G. Fusco, M. Iannelli, L. Salvadori, editors, Academic Press (1989): 247-251.
35. *Periodic Soliton Solutions to Nonlinear Klein-Gordon Equations on R^2* , Differential and Integral Equations 3 (3) (1990): 541-570.

36. *Quasiperiodic Soliton Solutions to Nonlinear Klein-Gordon Equations on R^2* , Mathematische Zeitschrift 203 (2) (1990): 235-253.
37. *Attracteurs Presque-Périodiques pour une Classe d'Equations Paraboliques Nonlinéaires du Type Réaction-Diffusion sur R^N* , Comptes Rendus de l'Académie des Sciences de Paris 311, I (1990): 583-588.
38. *Almost-Periodic Attractors for a Class of Nonautonomous Reaction-Diffusion Equations on R^N , I. Global Stabilization Processes*, Journal of Differential Equations 94 (2) (1991): 228-253.
39. *A Geometric Theory for Semilinear Almost-Periodic Parabolic Partial Differential Equations on R^N* , Proceedings of the School on Qualitative Aspects and Applications of Nonlinear Evolution Equations, P. de Mottoni, Li Ta-tsien, editors, World Scientific (1991): 185-201.
40. *Almost-Periodic Attractors for a Class of Nonautonomous Reaction-Diffusion Equations on R^N , II. Codimension-One Stable Manifolds*, Differential and Integral Equations 5 (3) (1992): 693-720.
41. *Small Divisors and the Construction of Stable Manifolds for Nonlinear Klein-Gordon Equations on $R^+ \times R$* , Proceedings of the International Workshop on Nonlinear Hyperbolic Equations, M.K.V. Murthy, S. Spagnolo, editors, Pitman Research Notes in Mathematics (1992): 197-213.
42. *Global Exponential Attractors for a Class of Almost-Periodic Parabolic Equations on R^N* , Proceedings of the American Mathematical Society 116 (3) (1992): 775-782.
43. *Variétés Inertielles et Stabilité de Liapounov pour une Classe d'Equations Paraboliques Semilinéaires Presque-Périodiques sur R^N* , Comptes Rendus de l'Académie des Sciences de Paris 316, I (1993): 711-716.
44. *Almost-Periodic Attractors for a Class of Nonautonomous Reaction-Diffusion Equations on R^N , III. Center Curves and Liapounov Stability*, Journal of Nonlinear Analysis: Theory, Methods and Applications 22 (5) (1994): 533-559.
45. *Geometric Methods in Nonlinear Analysis: Two Examples from the Theory of Nonlinear Partial Differential Equations*, Proceedings of the 3rd International Conference on Stochastic Processes, Physics and Geometry, S. Albeverio, U. Cattaneo, D. Merlini, editors, World Scientific (1995): 697-710.
46. (With Bernfeld S. and Hu Y. Y.) *Homogénéisation Spatiale et Equivalence Asymptotique pour une Classe d'Equations Paraboliques Semilinéaires Non-Autonomes*, Comptes Rendus de l'Académie des Sciences de Paris 320, I (1995): 859-862.
47. (With Chueshov I. D.) *On the Large-Time Dynamics of a Class of Random Parabolic Equations*, Comptes Rendus de l'Académie des Sciences de Paris 322, I (1996): 1181-1186.
48. (With Chueshov I. D.) *On the Large-Time Dynamics of a Class of Parabolic Equations Subjected to Homogeneous White Noise: Stratonovitch's Case*, Comptes Rendus de l'Académie des Sciences de Paris 323, I (1996): 29-33.

49. (With Bernfeld S.) *Asymptotic Behavior of Solutions of Limiting Differential Equations*, in Advances in Nonlinear Dynamics, Stability and Control Theory, Methods and Applications, V. Lakshmikantham, A.A. Martynuk, S.S. Sivasundaram, editors, Gordon and Breach (1997): 23-32.
50. (With Chueshov I. D.) *Long-Time Behavior of Solutions to a Class of Quasilinear Parabolic Equations with Random Coefficients*, Annales de l'Institut Henri-Poincaré, Analyse Nonlinéaire 15 (2) (1998): 191-232.
51. (With Bernfeld S. and Hu Y. Y.) *Large-Time Asymptotic Equivalence for a Class of Non-Autonomous Semilinear Parabolic Equations*, Bulletin des Sciences Mathématiques 122 (5) (1998): 337-368.
52. (With Chueshov I. D.) *On the Large-Time Dynamics of a Class of Parabolic Equations Subjected to Homogeneous White Noise: Itô's Case*, Comptes Rendus de l'Académie des Sciences de Paris 326, I (1998): 1299-1304.
53. (With Chueshov I. D.) *Long-Time Behavior of Solutions to a Class of Stochastic Parabolic Equations with Homogeneous White Noise: Stratonovitch's Case*, Probability Theory and Related Fields 112 (2) (1998): 149-202.
54. (With Bergé B. and Chueshov I. D.) *Lyapunov Exponents and Stability for Nonlinear SPDE's Driven by Finite-Dimensional Wiener Processes*, Comptes Rendus de l'Académie des Sciences de Paris 329, I (1999): 215-220.
55. (With Chueshov I. D.) *Long-Time Behavior of Solutions to a Class of Stochastic Parabolic Equations with Homogeneous White Noise: Itô's Case*, Stochastic Analysis and Applications 18 (4) (2000): 581-615.
56. (With Bergé B. and Chueshov I. D.) *On the Behavior of Solutions to Certain Parabolic SPDE's Driven by Wiener Processes*, Stochastic Processes and Their Applications 92 (2) (2001): 237-263.
57. (With Sanz-Solé M.) *Hölder-Sobolev Regularity of Solutions to a Class of SPDE's driven by a Spatially Colored Noise*, Comptes Rendus de l'Académie des Sciences de Paris 334, I (2002): 869-874.
58. (With Sanz-Solé M.) *Equivalence and Hölder-Sobolev Regularity of Solutions for a Class of Non Autonomous Stochastic Partial Differential Equations*, Annales de l'Institut Henri-Poincaré, Probabilités et Statistique 39 (4) (2003): 703-742.
59. (With Chueshov I. D.) *Non-Random Invariant Sets for Some Systems of Parabolic Stochastic Partial Differential Equations*, Stochastic Analysis and Applications 22 (6) (2004): 1421-1486.
60. (With Nualart D.) *Variational Solutions for a Class of Fractional Stochastic Partial Differential Equations*, Comptes Rendus de l'Académie des Sciences de Paris 340, I (2005): 281-286.
61. (With Nualart D.) *A Stabilization Phenomenon for a Class of Stochastic Partial Differential Equations*, Proceedings of the Seventh CIRM-International Conference on Stochastic Partial

Differential Equations and Applications, Lecture Notes in Pure and Applied Mathematics Series, G. Da Prato, L Tubaro, editors, Chapman and Hall/CRC, 245 (2005): 215-227.

62. (With Nualart D.) *Variational Solutions for Partial Differential Equations Driven by a Fractional Noise*, Journal of Functional Analysis, 232 (2) (2006): 390-454.

63. (With Wreszinski W. F. and Zagrebnov V. A.) *A Trotter-Kato Product Formula for a Class of Non-Autonomous Evolution Equations*, Nonlinear Analysis: Theory, Methods and Applications, 69 (3) (2008): 1067-1072.

64. (With Sanz-Solé M.) *Mild Solutions for a Class of Fractional SPDEs and Their Sample Paths*, Journal of Evolution Equations, 9 (2) (2009): 235-265.

65. (With Wreszinski W. F. and Zagrebnov V. A.) *A General Trotter-Kato Formula for a Class of Evolution Operators*, Journal of Functional Analysis, 257 (7) (2009): 2246-2290.

66. *A Generalization of Chernoff's Product Formula for Time-Dependent Operators*, Journal of Functional Analysis, 259 (11) (2010): 2923-2938.

67. (With Wreszinski W. F.) *Product Approximations for Solutions to a Class of Evolution Equations in Hilbert Space*, Portugaliae Mathematica, 68 (3) (2011): 317-343.

68. (With Zambrini J. C.) *Bernstein Diffusions for a Class of Linear Parabolic Partial Differential Equations*, Journal of Theoretical Probability, DOI 10.1007/s10959-012-0426-3 (2012), and 27 (2) (2014): 449-492.

69. (With Petersen W. P.) *Product Approximations for a Class of Quantum Anharmonic Oscillators*, Zeitschrift für Angewandte Mathematik und Physik, DOI 10.1007/s00033-013-0346-9 (2013), and 65 (4) (2014): 613-643.

70. (With Cruzeiro A. B.) *Forward-Backward Stochastic Differential Equations generated by Bernstein Diffusions*, Stochastic Analysis and Applications, DOI 10.1080/07362994.2014.968669 (2014), and 33 (1) (2015): 91-109.

71. (With Zambrini J. C.) *On Some Gaussian Bernstein Processes in RN and the Periodic Ornstein-Uhlenbeck Process*, Stochastic Analysis and Applications, DOI 10.1080/07362994.2016.1156547 (2016), and 34 (4) (2016): 573-597.

72. *On the Time Evolution of Bernstein Processes associated with a Class of Parabolic Equations*, Discrete and Continuous Dynamical Systems Series B, DOI 10.3934/dcdsb.2018142 (2018) and 23 (3) (2018): 1073-1090.

73. (With Dozzi M. and Touibi R.) *Global Variational Solutions to a Class of Fractional SPDE's on Unbounded Domains*, Stochastic Analysis and Applications, DOI 10.1080/07362994.2018.1535320 (2018), and 37 (1) (2019): 57-73.

74. (With Zambrini J. C.) *On Bernstein Processes generated by Hierarchies of Linear Parabolic Systems in RD*, Stochastic Processes and their Applications, DOI 10.1016/j.spa.2019.09.003 (2019), and 130 (5) (2020): 2974-3004.

75. *On Bernstein Processes of Maximal Entropy*, Stochastic Analysis and Applications, DOI 10.1080/07362994.2020.1733607 (2020), and 38 (5) (2020): 886-908.

76. (With Bögli S.) *A Spectral Theorem for the Semigroup generated by a Class of Infinitely Many Master Equations*, Acta Applicandae Mathematicae, DOI: 10.1007/s10440-022-00478-x (2022), and 178, 4 (2022).

77. (With Bögli S.) *On the Asymptotic Behavior of Solutions to a Class of Grand Canonical Master Equations*, Portugaliae Mathematica, DOI: 10.4171/PM/2102 (2023), and 80 (3/4) (2023): 269-289.

List of Invited Lectures:

1. *Sur l'Existence de Transitions de Phase dans une Classe de Systèmes Réticulaires Bidimensionnels*, Mathematical Physics Seminar, Swiss Institute of Technology, Lausanne (1974).

2. *Correlation Inequalities for Classical Heisenberg Ferromagnets*, Yeshiva Meeting on Statistical Mechanics, New York (1975).

3. *Correlation Inequalities in Classical Statistical Mechanics with Applications to the Problem of Phase Transitions in Ferromagnets*, Mathematical Physics Seminar, Princeton University, Princeton (1976).

4. *Hamiltonian Dynamics of the Classical Heisenberg Ferromagnet*, Yeshiva Meeting on Statistical Mechanics, New York (1978).

5. *Ergodic Properties of Some Random Magnetic Systems*, Mathematical Physics and Probability Seminar, Cornell University, Ithaca (1978).

6. *Nonlinear Dynamics Generated by Some Hamiltonian Systems*, Regional Conference on Nonlinear Wave Theory, Clarkson College, Postdam (1979).

7. *Nonlinear Hill's Equations and the Beam-Beam Interaction*, Symposium on the Physical and Mathematical Aspects of Beam-Beam Interactions, Brookhaven National Laboratory, Brookhaven (1979).

8. *Nonlinear Dynamics and the Beam-Beam Interaction*, SLAC Symposium on the Beam-Beam Interactions, Palo Alto (1980).

9. *Nonlinear Hill's Equations: Some Recent Results*, Regional Conference on Differential Equations, VPI, Blacksburg (1981).

10. *Periodic Solutions to Nonlinear Hill's Equations*, Regional Conference on Differential Equations, NCSU, Raleigh (1982).

11. *Variational Problems on Nonreflexive Banach Spaces*, Colloquium at the IMPA, Rio de Janeiro (1982).

12. *Isoperimetric Variational Problems on Certain Orlicz-Sobolev Spaces*, Regional Conference on Differential Equations, UAB, Birmingham (1983).

13. *Sturm-Liouville Eigenvalue Problems with Polynomial and Exponential Nonlinearities*, Special Session on Differential Equations, AMS Annual Meeting, Denver (1983).
14. *A Class of Elliptic Partial Differential Equations with Exponential Nonlinearities*, AMS Summer School on Nonlinear Functional Analysis, UC Berkeley, Berkeley (1983).
15. *Variational Problems on Orlicz-Sobolev Spaces*, Texas Conference on Partial Differential Equations, San Marcos (1984).
16. *Sharp Regularity Results for Some Degenerate Sturm-Liouville Eigenvalue Problems*, Western States Mathematical Physics Conference, California Institute of Technology, Pasadena (1985).
17. *Sharp Regularity Results for Some Degenerate Sturm-Liouville Eigenvalue Problems*, Nonlinear Analysis Seminar, University of Basel, Basel (1985).
18. *Regularity Theory for Elliptic Systems on Orlicz-Sobolev Spaces*, Analysis Seminar, ETH Mathematics Research Center, Zürich (1985).
19. *Restored Compactness and Sharp Existence Results for Some Degenerate Elliptic Eigenvalue Problems*, Center for Nonlinear Studies (CNLS), Los Alamos (1985).
